Hard working web developer with a strong background in management, a newfound passion for programming, and the ability to build a web presence from concept and design to writing code. Since 2016, self-directed learner, regular attendee of tech meetups and hackathons, and an open-source project contributor. Free time is spent self teaching French, travelling, tinkering with fountain pens, knitting, and volunteering.

Technical Skills

Ruby / Ruby on Rails	Sass / CSS	Git
JavaScript	Bootstrap	APIs
jQuery	HTML5	JSON
Python	PostgreSQL / MySQL	AJAX

Technical Projects

Travel Tracker   *Ruby on Rails, PostgreSQL, User Authentication, JavaScript, jQuery, AJAX*
A simple web application where user can plan and manage trip itineraries and funds with friends.
- *Create and manage trips, groups of friends, and funds for each trip.*

Book Search   *Ruby on Rails, PostgreSQL, User Authentication, JavaScript, API, jQuery, AJAX*
A book search web application conceived and created as a group project.
- *User can search, preview, and save books and progress to profile, as well as read/write book reviews.*

Admin Panel   *Ruby on Rails, PostgreSQL, User Authentication, JavaScript, jQuery, AJAX*
An admin panel for a fictitious school where the administrator can create, view, edit, and delete data.
- *Groups of cohorts are created by joining data from the class, teacher, and student tables.*

R-umblr Blog   *Ruby, Sinatra, PostgreSQL, User Authentication, JavaScript, jQuery, AJAX*
A full stack Tumblr clone with user management and restricted access via user authentication.
- *User can read, write, edit, and delete blog entries as well as edit profile information.*

Pokedex Website   *JavaScript, API, jQuery, AJAX, Bootstrap, Sass*
A Pokemon trainer website that pulls and displays Pokemon data from an external API.
- *SASS based responsive design incorporating jQuery animation and Bootstrap.*

Movie Info Website   *Python, HTML5, CSS*
A responsive website that displays movie information and trailers.
